▲ THINK THE LINK : 1. BALTIC INTERNATIONAL SUMMER SCHOOL

Hamburg's University of the Built Environment has installed a network of researchers, teachers and students from the Baltic Sea Region. With this year's focus „**at - over - on the water**“ 65 students from eight renowned universities create social and urban links of two of Hamburg's most developing districts - **HafenCity and Rothenburgsort**. Hence links not only emerge between districts and cities but also between countries and cultures in the **Baltic Sea Region**. The results ranging from artistic to architectural and engineering concepts are presented to an invited audience at the Finissage in presence of the **B.I.S.S. patroness Katharina Fegebank** , Second Mayor of the City of Hamburg and Senator for Science, Research and Equalities.
