

# Configuring Eduroam with the „Configuration Assistant Tool“ (CAT) on iOS devices

Updated May 2019

You have to be connected to the internet.

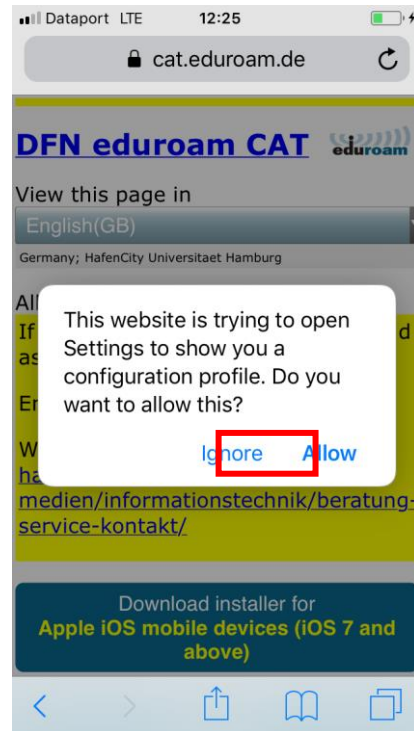

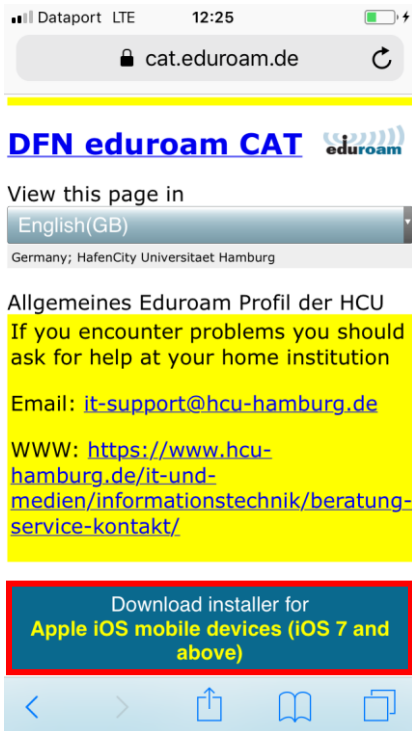

If you don't have access to the internet: Access the [www.hcu-hamburg.de](http://www.hcu-hamburg.de) Wi-Fi network. The website can be reached without the VPN-Client

Go to <https://cat.eduroam.de/>.

- Select your language.
- Select Germany as your country.
- Select HafenCity Universitaet Hamburg as your institution.
- Select your current Android version. You can find your current version in your Settings.  
Settings > General > About
- Click „Do you have an [...]“.

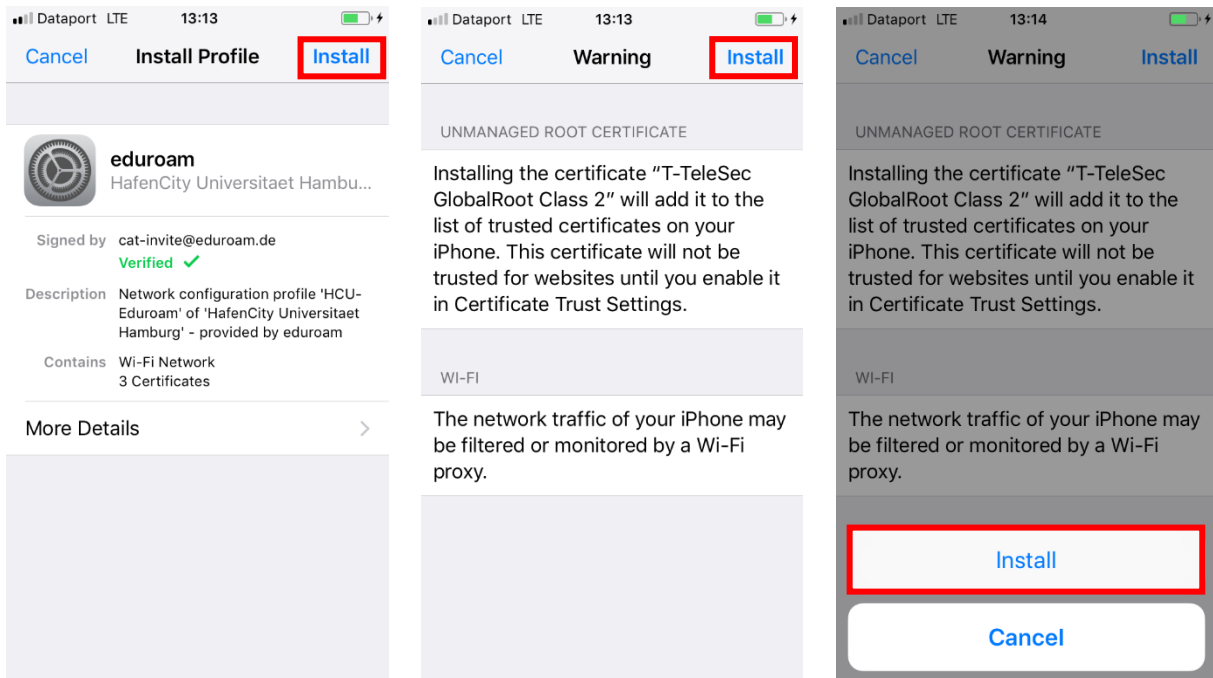

## HCU-IT → Instructions for Eduroam on iOS devices

→ Click the button to download the installer.

→ Click „Allow”

## HCU-IT → Instructions for Eduroam on iOS devices

Upon opening the app for the first time a similar screen should appear.

→ Click „Install“.

→ Click „Install“.

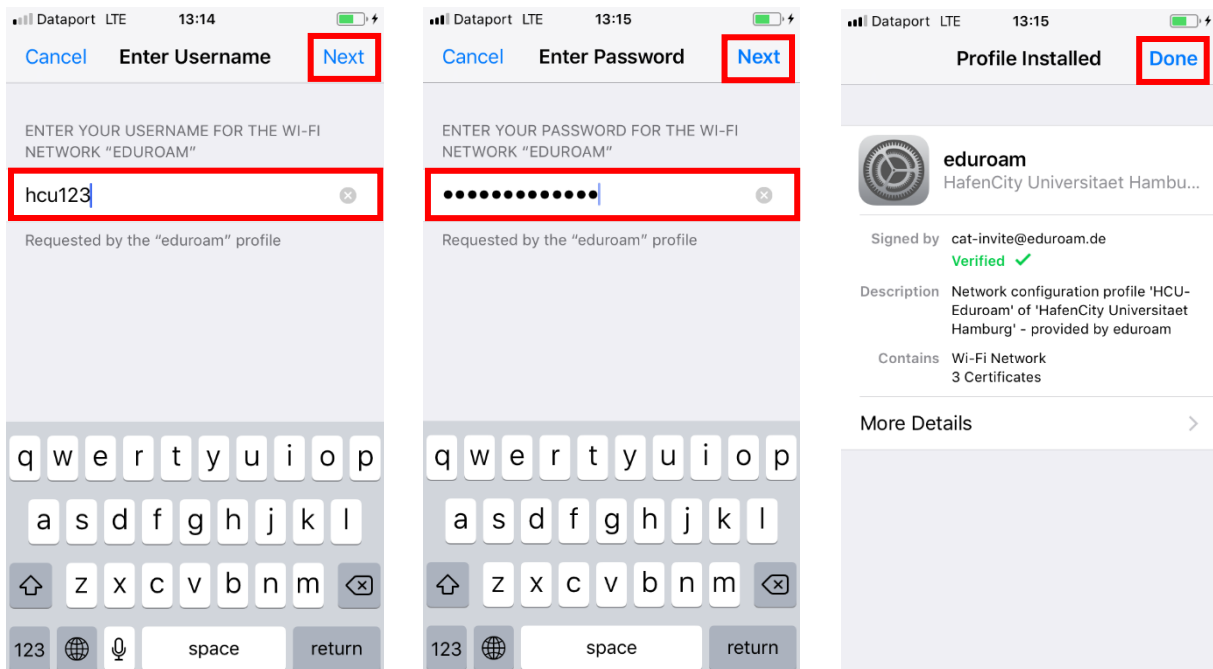

→ Click „Install“.

If you already have a profile installed:

→ Delete all installed profiles in your setting.

Setting > General > Profile > Eduroam > Remove Profile.

## HCU-IT → Instructions for Eduroam on iOS devices

To complete the installation for the Eduroam Profile you need to log in with your HCU-Profile.

→ Enter your HCU-username and password, for example hcu123@hcu-hamburg.de.

→ Click „Done“.

Your device should now automatically connect to the Eduroam Wi-Fi Network.
