

HCU-IT → Instructions for Eduroam on macOS devices

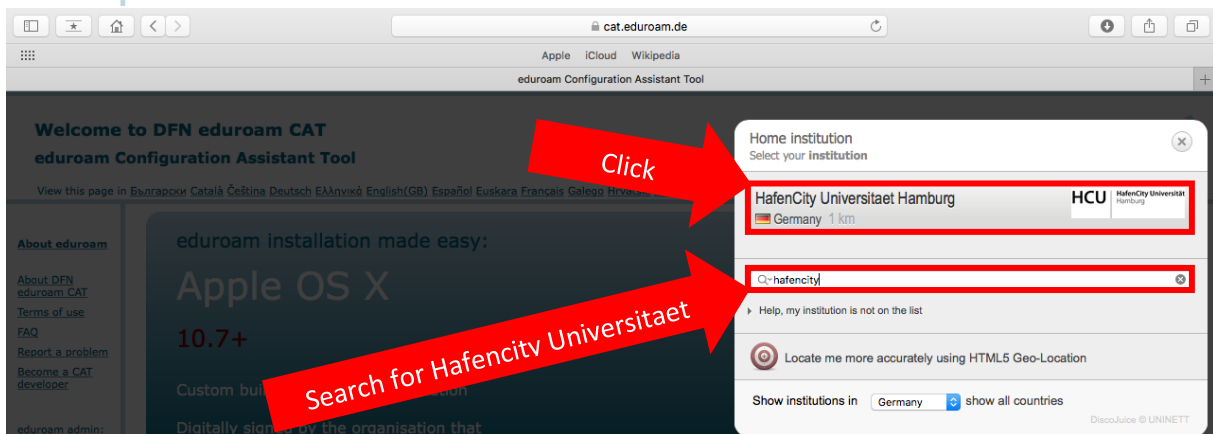

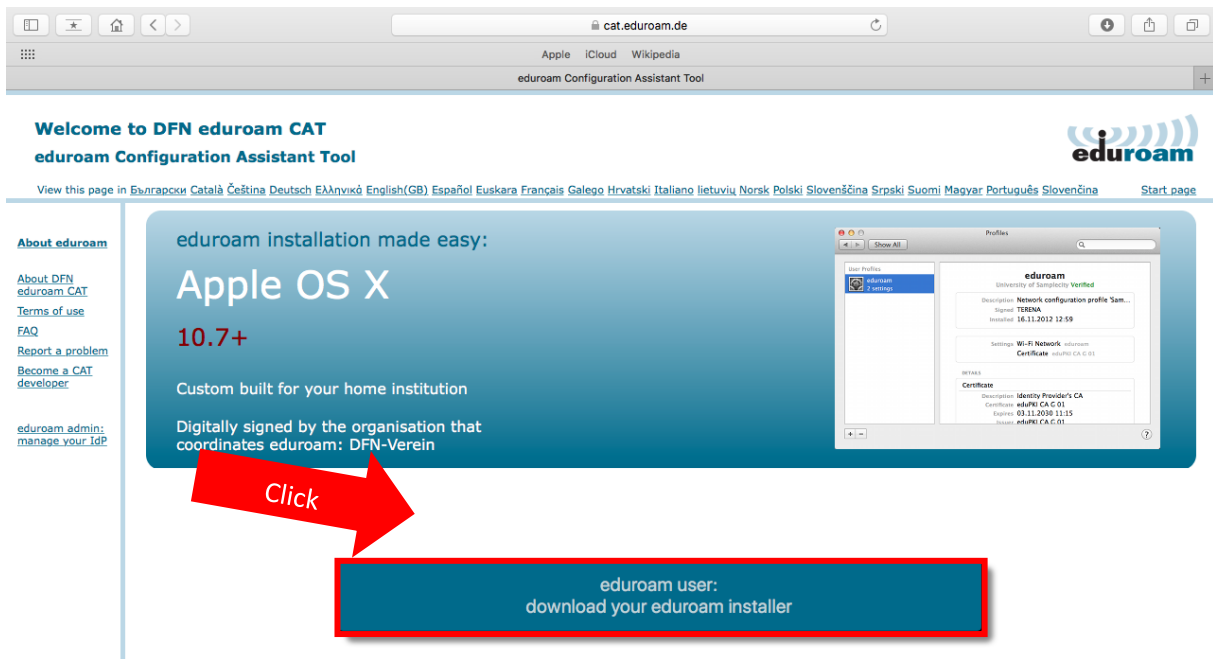

Configuring Eduroam with the „Configuration Assistant Tool“ (CAT) on macOS devices

Updated May 2019

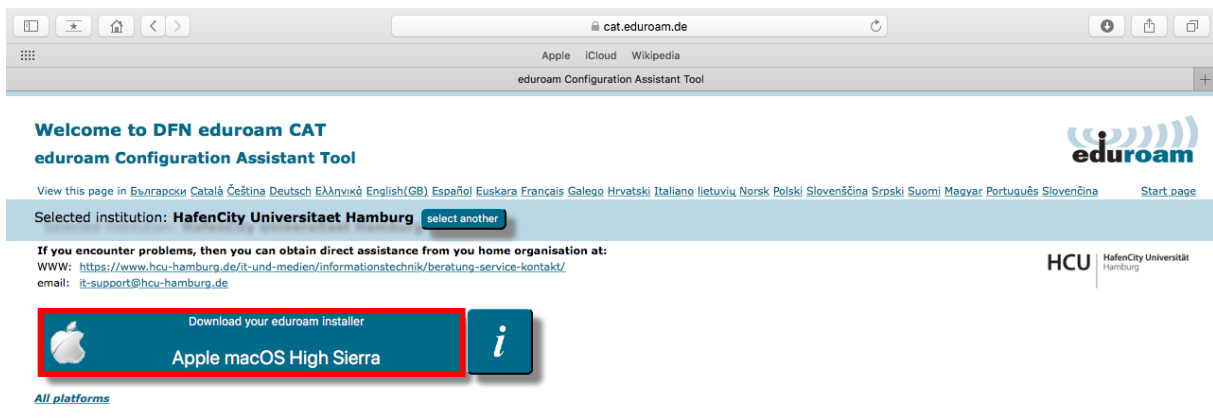

You have to be connected to the internet.

If you don't have access to the internet: Access the www.hcu-hamburg.de Wi-Fi network. The website can be reached without the VPN-Client

Go to <https://cat.eduroam.de/> and switch to the English version.

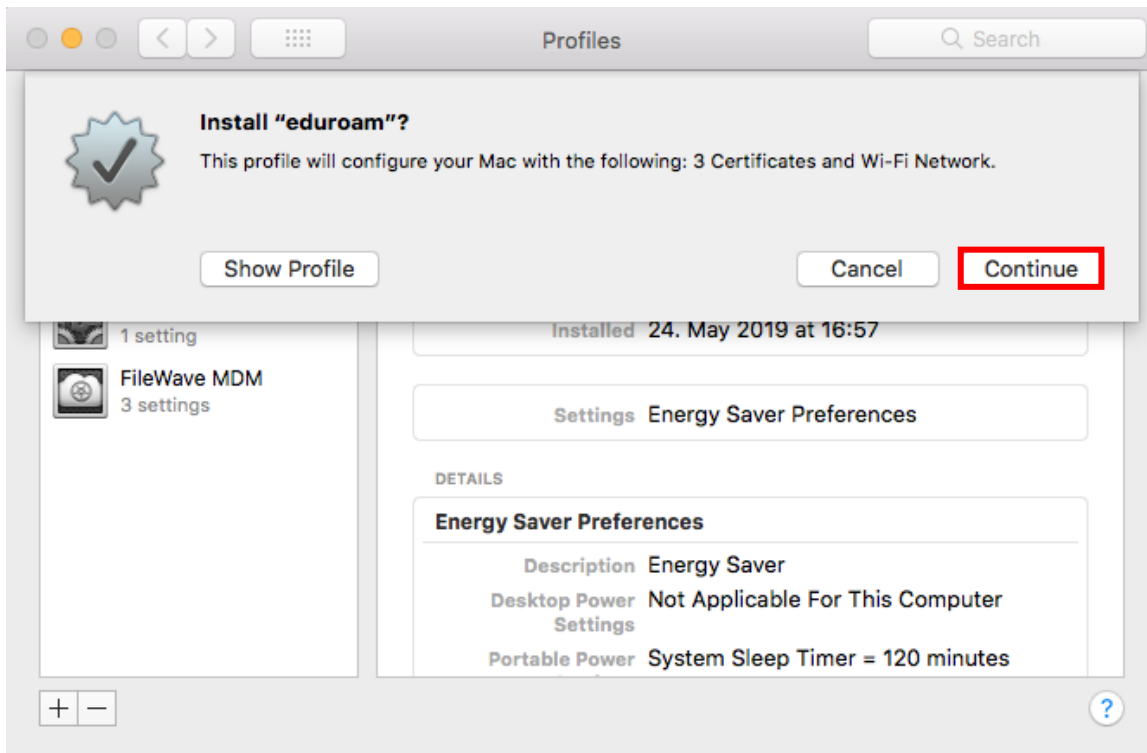

HCU-IT → Instructions for Eduroam on macOS devices

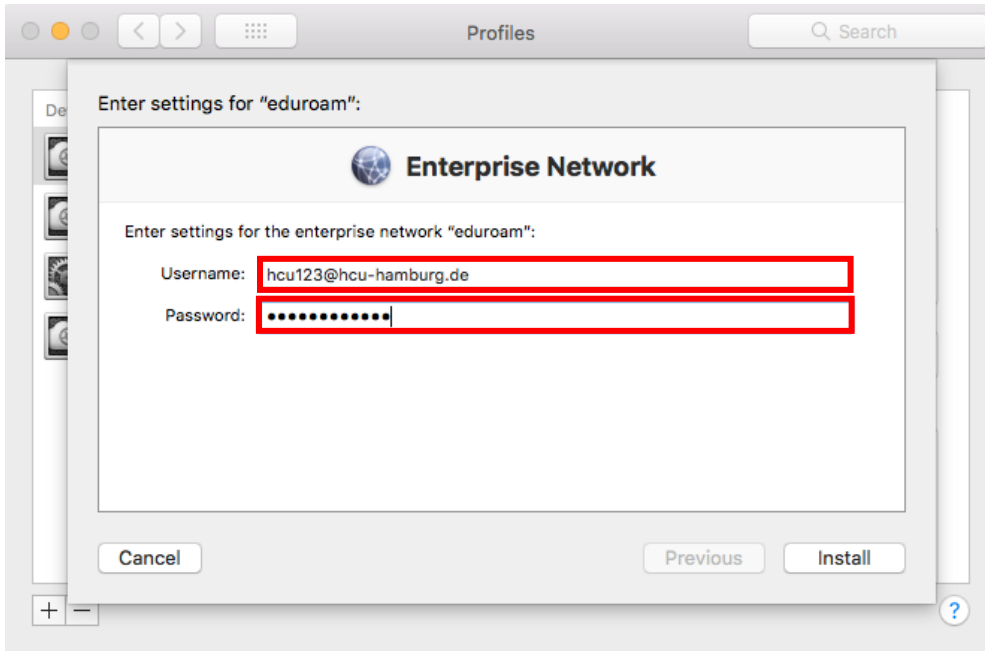

- Click the button to start the download.
- Leave the browser and go to your downloads.
- Open the downloaded file.

Opening the file will open your profiles.

- Click „Continue“.

HCU-IT → Instructions for Eduroam on macOS devices

→ Enter your HCU-username and password, for example hcu123@hcu-hamburg.de.

→ Click „Install“.

The installation is now complete. Your device should automatically connect to the Eduroam Wi-Fi Network.
